

1 Temperature increase altered *Daphnia* community structure in artificially heated lakes: a
2 potential scenario for a warmer future

6

7 SUPPLEMENTARY MATERIAL

8

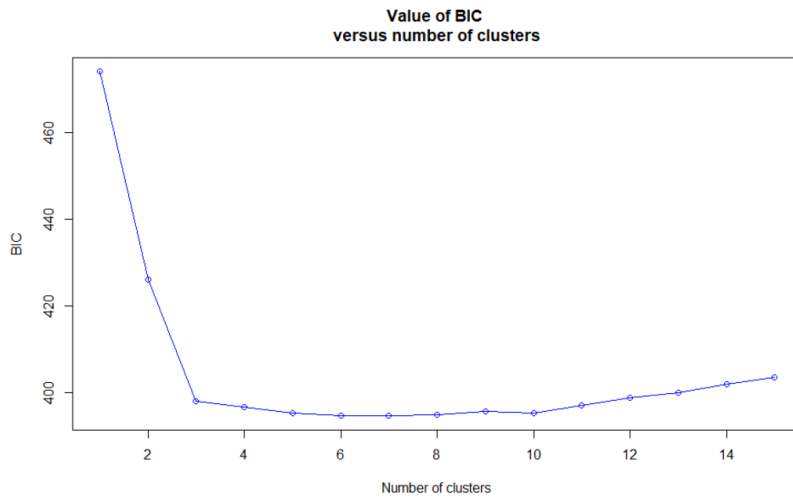

9

10 Fig. S1. Average summer temperature profiles of heated shallow (red) lakes Pałnowskie (PT),
11 Gosławskie (GS) and Licheńskie (LI), heated deep (yellow) lakes Ślesieńskie (SL) and
12 Wąsowsko-Mikorzyńskie (MI) and control (blue) lakes Gopło (GO), Skulskie (SK), Skulska
13 Wieś (SKPN) and Budziszławskie (BS; not used in this study).

14

15 Fig. S2. Map of the system (geographical coordinates: 52.4° N; 18.3° E) of heated shallow
 16 (red) lakes Pątnowskie (PT), Gosławskie (GS) and Licheńskie (LI), heated deep (yellow)
 17 lakes Ślesieńskie (SL) and Wąsowsko-Mikorzyńskie (MI) and control (blue) lakes Gopło
 18 (GO), Skulskie (SK), Skulska Wieś (SKPN) and Budziszławskie (BS; not used in this study).

19

20 Fig. S3. Bayesian Information Criterion support for different K-values for DAPC in all
 21 samples combined (upper panel), contemporary samples only (middle panel), and resting eggs
 22 only (bottom panel).

23

24 Fig. S4. Plot of the assignment probability of contemporary samples and resting eggs to three
 25 genetically distinct clusters (different colours) inferred with STRUCTURE, based on
 26 microsatellite data. Individuals are grouped by lake of origin. Each bar represents an
 27 individual's assignment probability to three inferred clusters (purple, green or orange).
 28 Contemporary samples are grouped as follows: three control lakes (SK, SKPN, GO), two
 29 transitional heated lakes (SL, MI) and three heated lakes (PT, GS, LI). Resting eggs are
 30 grouped as follows: PRE-H – produced before the onset of heating, MID-H – produced after
 31 the launch of the first plant but before the launch of the second power plant, POST-H –
 32 produced in the ca. 15 years following the launch of the second power plant, REC – produced
 33 recently, i.e. within 15 years of core collection.

34

36 Table S1. Basic information about investigated lakes.

Country	Lake	Abbrev.	Group	Longitude	Latitude	Altitude	Surface km ²	Max.	Surf. Temp	Carlson's
								depth m	November*	TSI(SD) November*
Poland	Skulskie	SK	Control	18°32'E	52°47'N	86	1.6	8	6.19	44.15
Poland	Gopło	GO	Control	18°38'E	52°50'N	77	21.5	17	6.55	61.93
Poland	Skulska Wieś	SKPN	Control	18°32'E	52°49'N	87	1.2	17	6.99	50.74
Poland	Gosławickie	GS	Heated	18°14'E	52°17'N	80	4.55	3	10.82	54.15
Poland	Licheńskie	LI	Heated	18°20'E	52°18'N	80	1.48	13	9.32	49.57
Poland	Pątnowskie	PT	Heated	18°17'E	52°18'N	79	2.83	5	7.62	47.52
Poland	Ślesieńskie	SL	Heated	18°31'E	52°37'N	85	1.52	25	8	40.93
Poland	Mikorzyńskie	MI	Heated	18°31'E	52°35'N	85	2.52	37	9.82	40.93
